

COPAL PEDESTAL

EWE Studio's Copal Pedestal Table is composed by ten pieces linked together with hidden locks, making the observer feel like seven out of the ten parts of the table are just touching and hovering in the air, resulting in a magnificent visual tension that defies gravity on its cantilever. The pedestal, made out of Orizaba Black marble, achieves its balance through understanding the tangential connection of its parts and the hidden elements that allow them to be assembled together. The striking and simple expression of the piece creates a sense of purity and balance in a mystical and deep way.
